

Rudplan's team of experts provides services to fulfil requirements in terms of closure plans and mine site rehabilitation to the mining and mineral processing industry.

Rudplan can provide technical assistance to the client for the preparation of a closure plan and mine site rehabilitation based on the Ministry of Economy guidelines on mining site rehabilitation or any other governmental approved guidelines.

Services:

- Remedial options and rehabilitation cost definition and preparation of final closure plans;
- Site restoration planning, design and construction management;
- Construction/Dismantling management;
- Engineering and construction management for the implementation of site restoration techniques;
- Environmental follow-up and monitoring.
